Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 109 was developed by Technical Committee ISO/TC 72, *Textile machinery and allied machinery and accessories*, and was circulated to the member bodies in June 1981.

It has been approved by the member bodies of the following countries :

Australia	Japan	South Africa, Rep. of
Czechoslovakia	Korea, Rep. of	Switzerland
France	Mexico	Turkey
Germany, F. R.	Poland	USSR
India	Romania	Yugoslavia

The member bodies of the following countries expressed disapproval of the document on technical grounds :

Belgium
United Kingdom

This International Standard cancels and replaces ISO Recommendation R 109-1968, of which it constitutes a technical revision.

Textile machinery — Working widths of weaving machines

1 Scope and field of application

This International Standard defines the working width as well as other terms which relate to the main dimensions of the working widths of weaving machines.

This International Standard is applicable to weaving machines with or without shuttles, such as to weaving machines with projectiles or rapiers.
